Career Objective

My goal as a junior web developer is to enhance my front-end and back-end development skills and contribute to impactful projects. I aim to become a proficient full-stack developer and advance to a senior role.

Project

ElectroEvo,

GitHub: [Client](#) | [Server](#) | [Live Link](#)

Technologies Used: Tailwind CSS, Reactjs, Expressjs, Nodejs, MongoDB, Firebase

- ★ **User Posts and Controls:** Users can share detailed problem descriptions, update or delete their posts, and receive solutions from others.
- ★ **Product Recommendations:** Users can recommend products, share photos, and provide detailed reviews, creating a trusted repository.

BISTRO BOSS

GitHub: [Client](#) | [Server](#) | [Live Link](#)

Technologies Used: Tailwind CSS, Reactjs, Expressjs, Nodejs, MongoDB, Firebase

- ★ **Order Food and Payment Integration:** Users can browse the menu, select dishes, place orders, and securely make payments through an integrated gateway.
- ★ **Admin Panel with MongoDB Database:** Admins can manage the menu by adding, updating, and removing food items, with data stored in a MongoDB database.

Alphabet-clash

GitHub: [Client](#) | [Server](#) | [Live Link](#)

Technologies Used: HTML, CSS, JavaScript, Tailwind CSS

- ★ **Random Letter Display and Scoring:** The game shows random letters for users to click on, awarding points for correct clicks to encourage speed and accuracy.
- ★ **Life System:** Users have limited lives that decrease with incorrect clicks, ending the game when all lives are lost, and adding excitement and urgency.

SKILLS: HTML, CSS, JavaScript, Reactjs, Nodejs, Expressjs, MongoDB, Firebase, Tailwind CSS, Nextjs(Basic), English, Bengali, Team work, Problem solving
